

SURYA R M

Aspiring Full Stack Engineer

Bengaluru, India | +91 9964099996 | suryamanjunath0124@gmail.com
github.com/Surya-246

PROFESSIONAL SUMMARY

Full Stack engineering candidate with hands-on project experience in Python, AWS cloud infrastructure, and DevOps automation including CI/CD, Infrastructure as Code, and serverless computing. Comfortable working across the stack, from backend logic and REST APIs to cloud deployment and Linux server administration. Strong SQL fundamentals and currently building full-stack proficiency with ReactJS and React Native. Collaborative, detail-oriented, and eager to contribute to end-to-end product development.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Backend & APIs: REST API Design & Integration, AWS Lambda, API Gateway

Cloud & DevOps: AWS EC2, S3, IAM, Lambda, API Gateway, CloudWatch, VPC, AWS CDK, CloudFormation, Docker Fundamentals

CI/CD & Version Control: GitHub Actions, Git, GitHub, Automated Deployment Pipelines

Database: SQL, Relational Database Fundamentals

Operating Systems: Linux, Amazon Linux, Server Administration, Windows

Currently Building: ReactJS, TypeScript, React Native

Soft Skills: Communication, Teamwork, Collaboration, Problem-Solving

EDUCATION

Master of Computer Applications (MCA) Jain Deemed-to-be University, Bengaluru	2025 – 2027 8.26 SGPA
Bachelor of Computer Applications (BCA) Acharya Bangalore Business School, Bengaluru	2022 – 2025 9.04 CGPA

PROJECTS

Cloud Native CI/CD Pipeline | *GitHub Actions · AWS EC2 · Apache · SSH*

- Built an end-to-end CI/CD pipeline that automatically deploys a web application to AWS EC2 whenever code is pushed to GitHub, eliminating manual deployment steps.
- Configured secure SSH-based deployment authentication using GitHub Secrets and set up an Apache web server on Amazon Linux 2023.
- Designed the deployment workflow (GitHub → GitHub Actions → EC2) and configured EC2 security groups for controlled SSH and HTTP access.

[GitHub: Cloud-Native-CICD-Pipeline](#)

AWS CDK Infrastructure Project | *AWS CDK · TypeScript · EC2 · VPC · S3 · CloudFormation*

- Provisioned and deployed a complete AWS infrastructure stack using Infrastructure as Code with AWS CDK and TypeScript, including a custom VPC, public subnets, and an internet gateway.
- Automated deployment of a web application on EC2 with Apache, backed by an S3 bucket, security groups, and IAM roles.
- Created reproducible infrastructure using `cdk deploy` and clean removal using `cdk destroy`.
- Applied AWS networking and Infrastructure as Code concepts to build repeatable, version-controlled cloud infrastructure.

[GitHub: AWS-CDK-Infrastructure](#)

AWS Serverless API | *AWS Lambda · API Gateway · Python · CloudWatch*

- Built a serverless REST API using AWS Lambda for backend logic and Amazon API Gateway for request routing.
- Implemented event-driven, auto-scaling backend execution and tested API endpoints using HTTP requests.

- Configured IAM permissions and CloudWatch logging for monitoring, debugging, and execution tracking.

Java Resume Eligibility Checker (Mini ATS) | *Java · Java Swing · Skill-Matching Logic*

- Developed a desktop application that automates resume screening by comparing candidate resumes against company job requirements.
- Implemented skill-based matching logic that calculates match percentages and identifies missing skills for single or multiple companies.
- Designed an interactive Java Swing GUI for resume input, company selection, and results display.

CERTIFICATIONS & COURSES

- AWS Cloud Practitioner — Udemy (In Progress)
- Cybersecurity — Cisco
- Network Architecture — Coursera
- Ordered Data Structures — Coursera

ACHIEVEMENTS

- District-level Shot-put Player
- Taekwondo Blue Belt Holder
- Participated in Dance Competition
- Selected for Esports (Mobile Game) Competition

LANGUAGES

English | Kannada | Telugu | Hindi
